

Sean Forquer

Product Designer

(614) 578-0801 · seanmforquer@gmail.com · seanforquer.com · linkedin.com/in/seanforquer

I turn ambiguous problems into shipped products, whether that means laying design foundations where none exist or plugging into an established design org and pushing it forward.

EXPERIENCE

Foxen Lead Product Designer

Mar 2024 – Present

Lead design across Foxen's full product surface (resident portal, property manager portal, and internal tooling), partnering with every department to refine offerings and bring new products to market.

Designed **PetClear** from zero to launch, choosing flexible patterns that let a simple read-only tool absorb AI document analysis and grow into a full screening platform: **\$4M+ in first-year bookings**, ~7% of company revenue, and Foxen's fastest-growing product.

Redesigned the claims process around where money actually leaked, moving a public form behind property manager authentication with data-aware, in-form feedback: **\$650k/yr saved** in adjudication costs.

Rebuilt the insurance document upload flow around the reality that people don't read, replacing instructions with real-time AI analysis of uploaded documents: out-of-scope submissions fell from 30% to 5%, **saving \$500k+/yr**.

Ground every product backlog in evidence from onsite field studies, surveys, and session monitoring; use AI and automation to scale design output without linearly scaling cost.

Gozio Health Sr. Product Designer, Platform

Nov 2022 – Feb 2024 · Remote

Led design on Gozio's no-code app builder platform, owning its design system and validating work through user testing and rapid prototyping.

Drove the organization-wide transition from Sketch to Figma and partnered with PM, PO, and CPO to shape the platform backlog.

CoinFX (MoveMoney) Product Designer (Contract)

Oct 2023 – Feb 2024 · Remote

Designed core flows for a Solana-powered stablecoin remittance app serving the US–Mexico corridor: cash deposits at 80,000+ retail locations, instant cross-border transfers on crypto rails, and fund claiming for recipients without US bank accounts, inside a licensed money-transmission, FDIC-insured context.

Diagnosed post-launch underperformance through session recordings, cold user outreach, and community-proxy research; redesigned the cash deposit and claim experiences around trust and expectation management, against business goals of deposit volume, transaction volume, and in-country withdrawals.

Fifth Third Bank Sr. Product Designer (Contract)

Mar 2022 – Nov 2022 · Remote

Designed Fifth Third's AI chatbot experience and established interaction design principles for a greenfield mobile banking experience.

Led initiatives that sold product design and product thinking to bank leadership.

DMI UX Designer

Mar 2021 – Mar 2022 · Remote

Led research, wireframing, and prototyping for a boutique health insurer's web and mobile experiences while managing the client relationship end to end.

Uptick Product Design Lead

Oct 2020 – Apr 2022

Led design from zero to launch for an early-stage crypto startup, establishing its first design language and shipping the founding product experience.

Earlier: Nationwide Insurance, UX Designer / Quality Engineer (2019 – 2021) · Medasource, Enterprise Design Consultant for OSU Wexner Medical (2018 – 2019) · Hyland Software, Enterprise Design Consultant (2016 – 2018)
